Complete feed for adult cats with a normal activity level. It stands out for its high amount of energy (435 Kcal every 100 g of product), high palatability and complete digestibility. Nuova Fattoria introduced the concept of selective extrusion of food: this production technique enhances the nutritional values and the assimilation of the product, leaving ingredient characteristics unchanged.

## INSTRUCTIONS FOR USE

The recommended daily feed amount will be tailored to the needs of your cat by considering the state of health and the activity level of the cat, as well as external weather conditions. Always leave fresh and clean water available. Keep in a fresh and dry place.
